

The Tamborine Mountain Chamber of Commerce & Industry Inc needed a solution to be able to supply paid Public Internet Access to visitors to the Tamborine Mountain Visitor Information Centre.

The need was to allow visitors to (a) use our Kiosk PC or (b) their own mobile device (i.e. Laptop, Netbook, iPad, Smart Phone etc) to have full paid Internet Access.

We needed this to be as secure and flexible as possible, including customisable content filtering, whilst being as simple as possible to operate as the Visitor Information Staff are all part-time volunteers and many are not computer literate.

We did a lot of research and finally made a choice to go with Arinda and purchased Surf Easy Desktop Software with a Wireless Hotspot.

The Arinda support staff assisted us all the way in getting our installation up and running in the quickest time and were friendly and helpful at all times.

We are very happy with the product and the excellent support from Arinda and recommend them highly!
